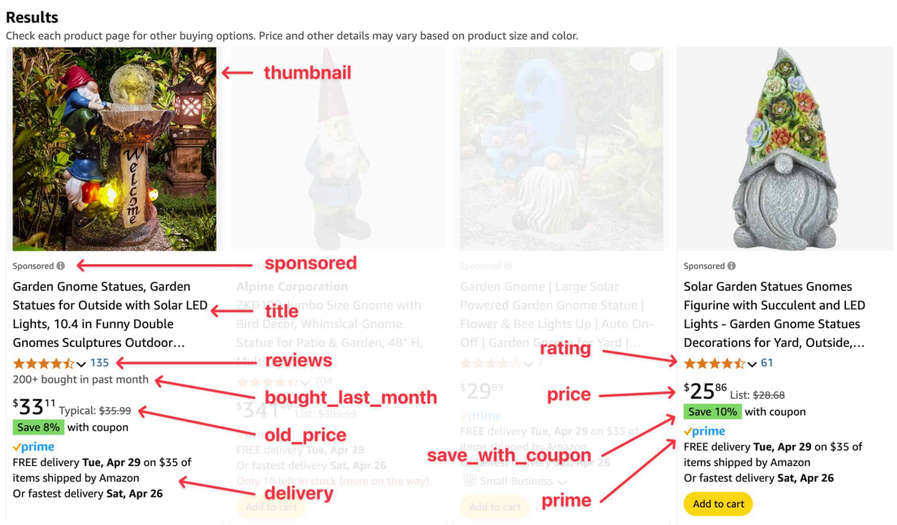
Amazon Organic Results API

Amazon search main product results are called Organic Results. Some results are simple and straightforward. Others include rich data like ratings, thumbnails, delivery information, and other special snippets. SerpApi is able to scrape, extract, and make sense of both simple and more complex organic results.

When SerpApi encounters Organic Results, we add them to our JSON output as the array `organic_results` .

API Examples

Organic results overview



GET

```
https://serpapi.com/search.json?engine=amazon&k=garden+gnome
```

Code to integrate Ruby

```ruby
require "serpapi"

client = SerpApi::Client.new(
  engine: "amazon",
  k: "garden gnome",
  api_key:
"a85853e3401522bd0dbb7b0d6b4901dc8a5849baae4354be6cea1dd229296958"
)

results = client.search
organic_results = results[:organic_results]
```
